\*For most realistic League play, when possible, allow only above pitchers preceded by an asterisk to start once every four games (3 games rest between starts). All other starting pitchers should start once every 5 games (4 game rest between starts). Also, we suggest that Taylor of Pittsburgh, Martinez of Houston, and all 96 additional players be used in secondary roles.

Below is a coupon containing prices of miscellaneous Strat-O-Matic Baseball Items. All are self-explanatory with the exception of the 20 nameless player cards. Nameless Player Cards are nameless cards fully computed and statistically setup. You will therefore be in a position to create cards for rookies and veterans not included in the "top 480". This is accomplished by designating a nameless card to be the equivalent in ability to an individual rookie playing a major role in the 1970 pennant race.

In addition to the top 480 players, we are releasing for our most avid baseball fans, 96 additional players or 4 players per team from the 1969 season. By adding these players to the rosters of the top 480 players, you can have 24 players per team. It must be noted that several of the additional player cards are based on insufficient 1969 statistical data. The 96 additional players may be purchased as a separate unit only for the special price of \$2.00. Individual players will not be sold from this unit. A listing of all 96 additional players (48 additional players - American League and 48 additional players - National League) may be found on this roster sheet.
