Miscellaneous information—Due to insignificant 1974 statistical information, Terry Harmon's card is based on his 1973 statistics.

Herb Washington may be added to the Oakland A's roster as a baserunner only with the following ratings—stealing—A and baserunning 1—17 The basic version's fielding position listing is the correct order for a player whose basic and advanced sides of card differ in fielding position order. The scoreboard may be found on the back cover or on the advanced strategy chart included among the game parts.

Any American League batter may be placed in the lineup as a designated pinch-hitter. Players lacking fielding positions may be used in a pinch-hitting capacity (designated or otherwise).

In American League play only, an injury occurs to the pitcher in the field when a white 6 and a red dice total of 12 is rolled, only when the DPH is at bat. This rule applies only to the American League.

Advanced Game Stealing—Catcher's Throwing Arm Included—a catcher's throwing arm will affect all steal attempts. Simply add or subtract the number in parenthesis following the catcher's fielding rating from the steal rating of the involved baserunner. If the defensive manager elects to hold the runner on base the following deduction is made, based on the stealing rating of the involved baserunner:

| | | | | | | |
|-----|----|----|----|----|----|----|
| AAA | AA | A | B | C | D | E |
| -1 | -3 | -3 | -4 | -4 | -5 | -5 |

For example, if a B baserunner attempts to steal second base against a catcher with a throwing arm of -1 while being held, his safe possibilities are 1—8 instead of 1—13. Please apply the groundball ++ rule as stated in the advanced game stealing section when runners are being held.

For most realistic League play, when possible, allow only above pitchers preceded by an asterisk to start once every four games (3 game rest between starts). All other starting pitchers should start once every 5 games (4 game rest between starts). Also, we suggest that all 96 additional players be used in secondary roles.

In addition to the top 480 players, we are releasing for our most avid baseball fans, 96 additional players or 4 players per team from the 1974 season. By adding these players to the rosters of the top 480 players, you can have 24 players per team. It must be noted that several of the additional player cards are based on insufficient 1974 statistical data. The 96 additional players may be purchased as a separate unit only for the special price of \$2.70. Individual players will not be sold from this unit. A listing of all 96 additional players (48 additional players—American League and 48 additional players — National League) may be found on this roster sheet. With each purchase of 96 additional players, four extra players will automatically be included free of charge (our Strat-O-Matic flyer does not mention this free bonus). As these players do not have team names indicated on their cards, you must write the team name in. Below is a list of the four involved players, teams played for (last team mentioned is team of record at season's end) and number of games played.

| | | | | |
|----------------|-------|------------|------------|------|
| Alex Johnson | — 114 | Texas | N.Y. Yanks | — 10 |
| Jim Northrup | — 97 | Detroit | Baltimore | — 8 |
| Bob Oliver | — 110 | California | Baltimore | — 9 |
| Frank Robinson | — 129 | California | Cleveland | — 15 |

You may eliminate a player of your choice from each team that receives one of the above players. Please do not write Strat-O-Matic regarding the above, as only your judgment is involved in this matter.
