**ADVANCED FIELDING CHART INSTRUCTIONS**

The same referral process for the regular fielding chart applies to the advanced fielding chart with one major exception—certain split card draws require a dice roll. Refer to the E rating of the involved defensive player, found on his card opposite his present playing position. Roll three dice referring to the defensive player's E rating section of the advanced fielding chart to determine outcome of play. If a reading yields a double result (i.e. E(2) 1-4, gbA 5-6,) the white die's value determines the correct result. For example, if a reading yields E(2) 1-4, gbA 5-6, refer to the present white die's reading. If the white die's reading is 1, 2, 3 or 4, a 2 base error E(2) has occurred. If the white die's reading is 5 or 6, a groundball A (gbA) has occurred.

**ADDITIONAL ABBREVIATIONS**

E(1) Error — batter is safe at first, runners advance 1 base.  
E(2) Error — batter is safe at second, runners advance 2 bases.  
E(3) Error — batter is safe at third, runners score.  
\*\*\* Runners advance 3 bases.

**"T" RATINGS**

If second or third base is successfully stolen, and a split card reading of 1, 2 or 3 is drawn, draw a second split card. Refer to the defensive catcher's card for his "T" number(s). If the drawn split card number is identical to one of the catcher's "T" numbers, a throwing error by the catcher has occurred, allowing the baserunner(s) to advance one additional base. No throwing error occurs if the drawn number is not listed among the defensive catcher's "T" number(s).

## 56 ADDITIONAL PLAYERS – AMERICAN LEAGUE

**TORONTO** – Ault, D., Coleman, J., Cruz, V., Lemanczyk, D.

If your game's instructions refer to the scoreboard's location as the back cover, please disregard this and refer to the strategy chart instead.

Any American League batter may be placed in the lineup as a designated hitter. Players lacking fielding positions may also be used in a pinch-hitting capacity.

In American League play only, an injury occurs to the pitcher in the field when a white 6 and a red dice total of 12 is rolled, only when the DH is at bat. This rule applies only to the American League.

Advanced Game Stealing – Catcher's Throwing Arm Included – a catcher's throwing arm will affect all steal attempts. Simply add or subtract the number in parenthesis following the catcher's fielding rating from the steal rating of the involved baserunner. If the defensive manager elects to hold the runner on base the following deduction is made, based on the stealing rating of the involved baserunner:

AAA	AA	A	B	C	D	E
-1	-3	-3	-4	-4	-5	-5

For example, if a B baserunner attempts to steal second base against a catcher with a throwing arm of -1 while being held, his safe possibilities are 1-8 instead of 1-13. Please apply the groundball ++ rule as stated in the advanced game stealing section when runners are being held.

For most realistic League play, when possible, allow only above pitchers preceded by an asterisk to start once every four games (3 game rest between starts). All other starting pitchers should start once every 5 games (4 game rest between starts). Also, we suggest that all 109 additional players be used in secondary roles.

In addition to the top 520 players, we are releasing for our most avid baseball fans 104 additional players or 4 players per team from the 1978 season. By adding these players to the rosters of the top 520 players, you can have 24 players per team. It must be noted that several of the additional player cards are based on insufficient 1978 statistical data. The 104 additional players may be purchased as a separate unit only for the special price of \$3.00. Individual players will not be sold from this unit. A listing of all 104 additional players (56 additional players—American League and 48 additional players—National League) may be found on this roster sheet.
