For most realistic play, when possible, allow only pitchers preceded by an asterisk to start once every four games (3 game rest between starts). All other starting pitchers should start once every 5 games (4 game rest between starts). We also suggest that all players be restricted to their actual number of at bats or innings pitched.

There are a number of players whose fielding ratings differ in the basic and advanced games. There is one player found on San Francisco whose name we are not permitted to use.

There are forty-six players with total cards based on combined statistics from both leagues. Some players will have three cards in the set; an American League card, a National League card and a total card, while other players will have two cards or one card. The number following a player's name indicates the number of extra cards. These total cards are found in the additional players. Listed below are the players and the games played with each team. Statistics will vary according to performance for each team. Last team mentioned is team of record at season's end.
