Witt (Tex) 1-13
Wojciechowski (Oak) 1-12

or most realistic league play, when possible, allow only pitchers preceded by an asterisk to start once every four games (3 game rest between starts). All other starting pitchers should start once every 5 games (4 game rest between starts.) We also suggest that all players be restricted to their actual number of at bats or innings pitched. Also there are thirteen players who have no name on their cards because of circumstances dictated by the MLBPA.

The following players have different fielding ratings in the basic and advanced games: Blauser(Atl), Boggs(NY-AL), Boone(Cin), Branson(Cin), Dye(Atl), Espinoza(Cle,NY-NL), Green(Tor), Hamilton(Tex), Hunter(Hou), Jones(Atl), Lofton(Cle), Martinez(NY-AL), Miliard(Fla), Nevin(Det), O'Neill(NY-AL), Rodriguez(NY-NL), Nameless(Bos), Valentin(Mil), Weiss(Col), and Young(Oak).

PLEASE NOTE THAT A 20 SIDED DIE IS NOW USED IN LIEU OF THE DOUBLE SPLIT DECK. PLEASE USE THIS DIE IN ALL SITUATIONS THAT NORMALLY CALL FOR THE SPLIT DECK.

For those players whose error ratings exceed the advanced fielding chart, use the maximum advanced error rating. When playing super advanced use the listed rating. For example, a player with a super advanced rating of 71 at 2B becomes 41 in the advanced game. Also in assigning a position for an outfielder not rated at that spot(SA chart), base the rating on the first outfield position listed on his card. For example Barry Bonds is LF-1, CF-3; base the new position (RF) on LF, which would make him a 2 In RF. There are twenty four players with cards in both leagues. Listed below are the players and the games played with each team. Statistics will vary according to performance for each team. Last team mentioned is team of record at season's end. Andujar Cedeno (NL) has no team name on his card. You must write in the team name.

Busmus	SD-50	Det-75
Caerga	Cle-100	NYN-28
Warders	StL-26	Cal-19
rumfield	Pit-29	Tor-90

The procedure to determine the weather is done only once - before the start of the game.

Note that a range of 0 indicates an automatic out. A range of 20 indicates an automatic hit. If a ball park reference falls outside the range then assume the following types of outs:

- BP Single left handed-batter - Lineout (2b)
- BP Single right handed-batter - Lineout (7b)
- BP Homerun left handed-batter - Flyball (7) B
- BP Homerun right handed-batter - Flyball (7) B

SUPER ADVANCED VERSION

◆ BALL PARK EFFECT - HOMERUNS - Ignore all readings that have a ◆ to the left of it. Instead, read the results found underneath the ◆ symbol of the ball park effects card. To obtain results, refer to the appropriate home stadium and the batting stance (L=Lefty or R=Righty) of the hitter. As in the advanced version, players with weak power (W) may not hit homeruns. In this situation, change all homerun results to single.

▲ - Refer to the second reading (in italics) under the number. Ignore the initial reading.

Ball park results (American and National Leagues) are based on a three year study. However, results for teams with revised ball park dimensions and extreme weather conditions are only based on present data.

(over)

This chart may be used in place of the ball park effect chart for those who wish to play with weather effects. To use this chart, first locate the home team's section of the chart. Then reference 1 of the 4 sections based on the month range that the die roll falls in. At this point, look across the chart to the weather section which will indicate the weather conditions (good, average or bad). To the right of the weather conditions are ballpark effects numbers for the type of weather.

For instance, a day game is to be played at St. Louis during July. Say you rolled a 14. Reading down the chart (in the JUN/JUL/AUG DAY section) the range this roll falls into is 12-17. Now read across to the WEATHER section which indicates that the weather conditions are AVG for this game, the ballpark singles range would be 1-7 and the ballpark homerun range would be 1-6 (for both left and right handed batters).

1996 SEASON NATIONAL LEAGUE - BALL PARK EFFECT

SUPER ADVANCED VERSION
In order to play the Super Advanced Version ALL symbols to the left of the numbers must be used. If you prefer to play the Advanced Version only, read the cards in the usual manner ignoring all symbols to the left of the numbers and all second readings.

CLUTCH HITTING - Occurs only in two-out situations in which one or more runners are in scoring position (occupying second or third base). When such a situation exists, and a reading is rolled that has a horseshoe symbol to the left of it, the results of the reading are reversed in the following manner: if the reading results in any type of an out, automatically reverse it to a SINGLE...; if the reading results in a single, automatically reverse it to a popup.

BALL PARK EFFECT - SINGLES - Ignore all readings that have a ▼ to the left of it. Instead, read the results found underneath the ▼ symbol of the ball park effects card. To obtain results, refer to the appropriate home stadium and the batting stance (Lefty or Righty) of the hitter. Most likely, you will roll a twenty sided die to determine the final outcome. (over)
