For most realistic league play, when possible, allow only pitchers preceded by an asterisk to start once every 5 games (3 game rest between starts). All other starting pitchers should start once every 5 games (4 game rest between starts). We also suggest that all players be restricted to their actual number of at bats or innings pitched. There are thirteen players who have no name on their cards because they are not members of the MLBPA. Four of these players are found in the additional players.

The following players have different fielding ratings in the basic and advanced games: Abbott (Oak), Alvarez (Det), Aries (SD), Aumus (Hou), Beltra (LA), Benjamin (Boe), Bogar (Hou), Boggs (TB), Bonilla (LA), Broslus (NY-AL), Davis (Sea), Gaetti (Chi-NL), Gianville (Phil), Griason (Mil), V. Guerrero (Mont), Hayes (SF), C. Jones (Atl), Jordan (StL), Klesko (Atl), Mabry (StL), McDonald (Oak), McGuire (Mont), Nunez (Pitt), O'Leary (Boe), Randa (Det), Reese (Cin), Retzlford (Phil), Rodriguez (Chi-NL), Segui (Sea), Tatis (Tex & StL), and White (Mont).

BASEBALL RULE CHANGES

1. Stealing / Holding Baserunners

Basic rules: If a baserunner is being held on base, refer to the catcher's fielding rating and make the following deductions from the STEALING section of the Basic Strategy Chart:

catcher-1: -4 catcher-2: -3 catcher-3: -2 catcher-4: -1 catcher-5: -1

These deductions apply only to AA, A, B, C, D and E stealing ratings. No deduction is allowed for a player with AAA stealing.

Advanced rules: Stealing / Holding Baserunners. If a baserunner is being held on base, calculate his stealing success by subtracting the catcher's throwing arm and making this further deduction, depending on his stealing grade:

AAA:-1 AA:-2 A:-2 B:-3 C:-3 D:-4 E:-4

2. Runner Advancement on Hits

Advanced/Super Advanced rules: When a runner is held on first or second, subtract 1 from his running rating when that rating is needed to determine whether he can advance an extra base on another's hit. If the baserunner is NOT being held, add 1 to his running rating. This calculation is in addition to other calculations (e.g. for two outs, or on throws from left field or right field). As before, the safe chance for the baserunner may not exceed 1-19.

NOTE: With the bases loaded or runners on 1st and 2nd base, the trail runner is the runner on 1st. This rule applies to that trail runner. Consider the trail runner held or not held, depending on whether the lead runner is held.

3. Runner Advancement to third on fly (rf) B.

Advanced/Super Advanced rules: On a fly (rf) B only, a runner at second base may advance with this calculation:

Baserunner's Running rating, +/- right fielder's arm, +2 for a throw to third base from right field. Roll the 20-sided die. however, the only OUT chance is the split chance of 20. If the roll is higher than the highest safe chance, but lower than 20, the runner holds at second base.

Example: A 1-14 runner and a -1 arm. Safe: 1-15; Hold 16-19; Out: 20.

NOTE: This rule does not apply to fly (rf) B? readings from cards or to F2 readings from the Super Advanced Fielding Chart. The Super Advanced Fielding Chart contains its own rule for potential advances from second base to third base on F2 results to right field.

4. Notes on GB1, GB2 and GB3 hit to the pitcher or catcher:

Super Advanced rules:

-- With Infield In, always consult the Infield In column on the Super Advanced Fielding Chart.

-- With Infield Back (Normal), always consult the Infield Normal column on the Super Advanced Fielding Chart.

-- With Corners In, with a runner on 3rd base only, or with runners on 2nd and 3rd, consult the Infield in column on the Super Advanced Fielding Chart. In all other baserunning situations, consult the Infield Normal column.

NEW RULE FOR 1999

Rule 18.31: With the bases loaded, and the corners or infield positioned in, downgrade the bunting rating two levels instead of one level. This is because there is a force play at home plate, and on a bunt the runner on third must try to advance if the ball is bunted on the ground. **EXAMPLE:** The bases are loaded and the corners are in with a batter who is an A bunter. In this case refer to the C bunting column on the squeeze play chart. Note: The worst possible adjusted bunting rating continues to be a rating of E.

There are three players who do not have team names on their cards. You must write in the team name. Below are the players mentioned, teams played for and the number of games played with each team: Please note that all these players will be found on Chicago (AL) even though they finished with other teams.

Chad Kreuter Chicago (AL) - 93 Anaheim - 3 Charlie O'Brien Chicago (AL) - 57 Anaheim - 5 Chris Sнопек Chicago (AL) - 53 Boston - 8

Nelson Liriano's player card of Colorado is based on combined statistics from the 1996-98 seasons.

SUPER ADVANCED VERSION

In order to play the Super Advanced Version ALL symbols to the left of the numbers must be used. If you prefer to play the Advanced Version only, read the cards in the usual manner ignoring all symbols to the left of the numbers and all second readings.

CLUTCH HITTING — Occurs only in two-out situations in which one or more runners are in scoring position (occupying second or third base). When such a situation exists, and a reading is rolled that has a horseshoe symbol to the left of it, the results of the reading are reversed in the following manner: if the reading results in any type of an out, automatically reverse it to a SINGLE⁺; if the reading results in a single, automatically reverse it to a popout.

BALL PARK EFFECT - SINGLES — Ignore all readings that have a ▼ to the left of it. Instead, read the results found underneath the ▼ symbol of the ball park effects card. To obtain results, refer to the appropriate home stadium and the batting stance (L=lefty or R=righty) of the hitter. Most likely, you will roll a twenty sided die to determine the final outcome.

This chart may be used in place of the ball park effect chart for those who wish to play with weather effects. To use this chart, first locate the home team's section of the chart. Then reference 1 of the 4 sections based on the month the game is played and whether this is a day game or a night game. Roll the 20 sided die and reading down find the range that the die roll falls in. At this point, look across the chart to the weather section which will indicate the weather conditions (Good, average or bad). To the right of the weather conditions are ballpark effects numbers for this type of weather.

For instance, a day game is to be played at Cleveland during July. Say you rolled a 14. Reading down the chart (in the JUN/JUL/AUG DAY section) the range this roll falls into is 12-17. Now read across to the WEATHER section which indicates that the weather conditions are AVG for this game; the ballpark angles range would be 1-14 and the ballpark homerun range would be 1-5 (for both left and right handed batters).

SUPER ADVANCED VERSION

◆ BALL PARK EFFECT - HOMERUNS — Ignore all readings that have a ◆ to the left of it. Instead, read the results found underneath the ◆ symbol of the ball park effects card. To obtain results, refer to the appropriate home stadium and the batting stance (L=lefty or R=righty) of the hitter. As in the advanced version, players with weak power (W) may not hit homeruns. In this situation, change all homerun results to single**.

△--Refer to the second reading (in italics) under the number. Ignore the initial reading. Ball park results (American and National Leagues) are based on a three year study. However, results for teams with revised ball park dimensions and extreme weather conditions are only based on present data.

The procedure to determine the weather is done only once - before the start of the game. Note that a range of 0 indicates an automatic out. A range of 20 indicates an automatic hit. If a ball park reference falls outside the range then assume the following types of outs:

BP Single left handed-batter - Lineout (2b)
 BP Single right handed-batter - Lineout (ss)
 BP Homerun left handed-batter - Flyball (rf) B
 BP Homerun right handed-batter - Flyball (lf) B
